What is a flex-fuel vehicle?
Flex-fuel vehicles, commonly called FFVs, are cars engineered to run on any ethanol-blended flex-fuel ethanol blend. They allow the driver, when enabled, to choose their fuel blend with as little as 10% ethanol. Drivers choose higher blends for a number of different reasons: price, cleaner burning fuel, and to support American jobs and American-made products.

Benefits of FFVs & Ethanol Blends
Ethanol can help lower the price of a gallon of fuel. Ethanol helps preserve gas for use in the future. Ethanol increases horsepower and torque. Ethanol helps clean up engine breathing and idling. Ethanol helps keep your engine clean by reducing carbon deposits. American ethanol increases our country's energy independence and strengthens our economic and national security by keeping American dollars at home rather than sending them to offshore countries to be made into oil and shipped around the globe.

FFVs on the Road Today
There are more than 11 million flex FFVs on the road today, including compact, sedan, minivan, pickup and SUV. American consumers are currently producing 10% of all new vehicles made per 2012 and beyond flex-fuel capable.

Finding an ethanol blend
There are approximately 1,200 retail outlets selling these ethanol blends across the country. There's probably one closer than you realize. Visit our website to find the nearest location you live or also see your Corolla or Civic for Ethanol. Call 1-800-955-3333 for more information.

Check your fuel tank
Look for an ethanol FFV badge
Look for a yellow gas cap
Consult your owner's manual

Choose ethanol.
